Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group A, claim(s) 1-9, drawn to a process of manufacturing a formulation of a topical beta-blocker with improved efficacy.

Group B, claim(s) 10-15, drawn to a formulation of a topical beta-blocker.

The inventions listed as Groups A and B do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical feature linking group A and B is the formulation being produced. However, the formulation of a beta-blocker is known in the art. Therefore, the technical feature linking inventions of Group A-B does not constitute a special feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art. Accordingly, Group A-B are not linked by the same or a corresponding special technical feature as to form a single inventive concept.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
